GIO VENTURA BARRAMEDA

QA Engineer
gio.barrameda25@gmail.com | 0950-113-7412 | Antipolo City, Rizal | linkedin.com/in/giobarrameda

PROFESSIONAL SUMMARY

QA Engineer with 3+ years of experience in manual functional, integration, regression, and API testing for document processing and HR/payroll systems. Reduced production-critical defects by ~30% through structured regression testing and root cause analysis. Hands-on with Postman, Azure DevOps, and Elasticsearch log monitoring; currently building automation skills in Playwright, Python, and TypeScript.

WORK EXPERIENCE

QA Engineer I | Actimai Philippines, Inc., Pasig City | June 2024 - May 2026

- Reduced production-critical defects by ~30% through structured regression testing and root cause analysis, improving product reliability.
- Validated backend services through API testing with Postman, verifying response accuracy and data synchronization across systems.
- Investigated system issues using Elasticsearch log monitoring to trace failures to their root cause, supporting faster issue resolution and process improvement.

Junior QA Engineer | Actimai Philippines, Inc., Pasig City | February 2023 - June 2024

- Developed and maintained test plans, test cases, and execution reports covering functional, integration, regression, and usability testing.
- Logged and tracked defects in Azure DevOps through resolution, ensuring fixes met user acceptance criteria.
- Validated system workflow accuracy and product readiness prior to release.

PROJECTS

Document Processing Platform | Manual and API Testing (Postman)

- Tested document ingestion, workflow processing, and data extraction modules to ensure system reliability.
- Coordinated with developers during issue resolution to maintain data integrity across processing stages.

HR Portal System | Functional and User Acceptance Testing

- Validated attendance, payroll, and team management modules, ensuring accurate report generation.
- Supported stakeholders during system validation and acceptance activities, improving user satisfaction.

SKILLS

Testing: Functional, Integration, Regression, Usability, and User Acceptance Testing; Test Plans and Test Cases; Defect Management; Root Cause Analysis; API Testing
Tools: Postman, Azure DevOps (work-item and defect tracking), Elasticsearch (log monitoring), UiPath Studio (basic), Selenium (training)
Currently Learning: Playwright, Python, TypeScript
Methodologies: SDLC, Agile, Requirements Analysis
Professional: Cross-Functional Collaboration, Stakeholder Management, Technical Documentation, Process Improvement

EDUCATION

Bachelor of Science in Computer Engineering | Polytechnic University of the Philippines, Sta. Mesa, Manila | November 2022
Cum Laude

TRAINING

ISTQB Foundation Level Training
Software Test Engineer Training
